

Sample Data

Okapi

The okapi is also known as the forest giraffe. The okapi stands about 1.5 m (4.9 ft) tall at the shoulder and has a typical body length around 2.5 m (8.2 ft). Its weight ranges from 200 to 350 kg (440 to 770 lb). It has a long neck, and large, flexible ears. Its coat is a chocolate to reddish brown, much in contrast with the white horizontal stripes and rings on the legs, and white ankles. Male okapis have short, hair-covered, horn-like protuberances on their heads called [ossicones](#), less than 15 cm (5.9 in) in length. Females possess [hair whorls](#), and ossicones are absent.

The Treasure of the Sierra Madre

The Treasure of the Sierra Madre was one of the first Hollywood productions to be shot on location outside the United States (in the state of Durango with street scenes in Tampico, Mexico), although many scenes were filmed back in the studio and elsewhere in the US. The movie is quite faithful to the source novel. In 1990, the film was selected for preservation in the United States National Film Registry by the Library of Congress as being "culturally, historically, or aesthetically significant".

The Cook Islands

The Cook Islands (Cook Islands Māori: Kūki 'Āirani)[6] is a self-governing island country in the South Pacific Ocean in free association with New Zealand. It comprises 15 islands whose total land area is 240 square kilometres (92.7 sq mi). The Cook Islands' Exclusive Economic Zone (EEZ) covers 1,800,000 square kilometres (690,000 sq mi) of ocean.[7]

New Zealand is responsible for the Cook Islands' defence and foreign affairs, but they are exercised in consultation with the Cook Islands. In recent times, the Cook Islands have adopted an increasingly independent foreign policy. Although Cook Islanders are citizens of New Zealand, they have the status of Cook Islands nationals, which is not given to other New Zealand citizens. The Cook Islands has been an active member of the Pacific Community since 1980.

Voyager 2 Probe Enters Interstellar Space

Comparing data from different instruments aboard the trailblazing spacecraft, mission scientists determined the probe crossed the outer edge of the heliosphere on Nov. 5. This boundary, called the heliopause, is where the tenuous, hot solar wind meets the cold, dense interstellar medium. Its twin, Voyager 1, crossed this boundary in 2012, but Voyager 2 carries a working instrument that will provide first-of-its-kind observations of the nature of this gateway into interstellar space.

Stanene Production Facility

Stanene was theoretically predicted to be a 2D topological insulator in 2011,^[6] and its functionalized derivations as topological insulators were predicted in 2013.^[7] Both may display dissipationless superconductive currents at their edges near [room temperature](#). The addition of [fluorine](#) atoms to the tin lattice could extend the operating temperature up to 100 °C.^[8] This would make it practical for use in [integrated circuits](#) to make smaller, faster and more energy efficient computers.

Splash Mountain is a [log flume](#) at [Disneyland](#), [Tokyo Disneyland](#), and the [Magic Kingdom](#) at the [Walt Disney World Resort](#), based on the characters, stories, and songs from the 1946 [Disney](#) film [Song of the South](#). Although there are variations in the story and features between the three locations, each installation begins with a peaceful outdoor float-through that leads to indoor [dark ride](#) segments, with a climactic steep drop into a "briar patch" followed by an indoor finale. The drop is 50 feet (15 m).

Edgar Allen Poe

An American writer, editor, and literary critic. Poe is best known for his poetry and short stories, particularly his tales of mystery and the macabre. He is widely regarded as a central figure of [Romanticism](#) in the United States and of American literature as a whole, and he was one of the country's earliest practitioners of the short story. He is generally considered the inventor of the detective fiction genre and is further credited with contributing to the emerging genre of science fiction.^[1] He was the first well-known American writer to earn a living through writing alone, resulting in a financially difficult life and career.^[2]
